SUMMARY

Flutter developer with 2+ years of professional experience building and shipping production mobile apps end-to-end. Independently designed, built, and published **three apps** to Google Play and the Apple App Store, and delivered Flutter work across **six-plus more live apps** spanning healthcare, fintech, travel, retail, and field-sales domains. Strong in Dart, **Riverpod and Bloc** state management, responsive UI, and REST API integration — comfortable owning architecture and shipping reliable, maintainable code from design through deployment.

TECHNICAL SKILLS

Mobile (Flutter): Flutter, Dart, Riverpod, Bloc, responsive UI, REST API integration; KIOSK, consumer, and rider/delivery apps; Android, Google Play & App Store publishing

State Management: Riverpod, Bloc (Flutter); Redux, Context API, React Query, Zustand (React); React Hook Form, Formik

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI

Backend & APIs: PHP, Laravel (9/10), Node.js, NestJS, Express, FastAPI, RESTful API design, microservices

Databases: MySQL, PostgreSQL, MSSQL; AWS RDS configuration; query optimization, indexing

Auth & Security: JWT, OAuth2, Firebase Auth, Supabase Auth, role-based access control (RBAC)

DevOps: Git, Docker, GitHub Actions CI/CD, AWS (Windows & Linux), server configuration

AI & Dev Tools: Gemini API, OpenAI API, Claude Code, GitHub Copilot, LLM API integration, MCP clients

EXPERIENCE

Junior Software Engineer **Mar 2024 – Present**
Orange Solutions Limited (OSL), United Group | Dhaka, Bangladesh *On-site, Full-time*

- Develop and maintain cross-platform **Flutter applications** shipped to Google Play and the App Store, implementing responsive UI and integrating REST APIs across consumer, rider, KIOSK, and POS clients.
- Solely owned full features and standalone apps end-to-end — from architecture and state management through testing, store deployment, and post-release support — demonstrating readiness for senior-level ownership.
- Fixed bugs and improved app performance; tuned backend query performance via MySQL indexing and supported Docker-based CI/CD and AWS RDS configuration on staging environments.
- Collaborated closely with backend developers and UI/UX designers, and contributed to sprint planning and technical decisions.

Software Engineering Intern **Jan 2024 – Mar 2024**
Orange Solutions Limited (OSL), United Group | Dhaka, Bangladesh *On-site*

- Contributed to the Flutter user booking app and Flutter Cashier POS app for **Courtside Bangladesh** (United Group), and built the supporting Laravel + React admin panel with RBAC.
- Supported debugging, performance optimization, and backend improvements across internal products.

Software Engineer (Contract) **Jul 2023 – Jan 2024**
Swinroll Network Technologies Co., Ltd. | Hangzhou, China *Remote*

- Developed and **published Flutter and native Android applications** to the Google Play Store.
- Integrated Firebase authentication and push notifications; automated build/deploy workflows via Docker and GitHub Actions CI/CD.

PROJECTS

Independent — designed, built, and shipped solo:

Pocket Hishab — AI-Powered Personal Finance App *Flutter + Supabase + Gemini AI*

- Live on App Store & Google Play. Gemini-generated spending insights, rich transaction tracking, gamified saving-score and badges, biometric app lock (Face ID / fingerprint), and a backend-agnostic JSON-first architecture.

HabitUp: Habit Tracker *Flutter + Supabase*

- Live on Google Play. Flexible habit and routine planning, focus timers, a Rescue Ladder with smaller starter steps, consistency and streak analytics, customizable alarms with quiet hours, and accountability-mate sharing with activity-level controls.

Decode — AI-Powered Situational Clarity App *Flutter + Supabase + AI*

- Live on Google Play. AI-generated structured breakdowns using cautious, non-diagnostic language; anonymous-by-default auth with optional email sync, offline history, and a freemium subscription model.

Professional / Client — shipped to production stores:

TourifyX — Travel Marketplace & Booking Platform *Flutter + Node.js + MySQL*

- On the App Store & Google Play. Built the cross-platform Flutter traveler app end-to-end — curated tour discovery with destination, budget, duration, and mood filters; itineraries, reviews, and agency profiles; local wishlists; phone-OTP authentication; booking management; custom tour requests; and travel notifications — backed by a Node.js + Prisma + MySQL API with a React admin panel.

UniDash — Multi-Vendor Restaurant Ordering Platform *Flutter*

- Live on App Store & Google Play. Developed the UniDash website (unidash360.com). Solely built the rider delivery Flutter app and real-time order display system; collaborated on the KIOSK self-ordering app (live at Station by Chef's Table) and the customer Flutter app.

eJOTNO — Healthcare Platform *Flutter*

- App Store & Play Store. Built end-to-end: cross-platform Flutter app connecting users with verified doctors and caregivers, with role-based secure workflows and REST API integration.

ZAB Prottoy — Securities Trading Platform *Flutter*

- Live on Google Play. Adopted by 10+ BSEC-registered securities firms; real-time market charts, buy/sell order submission, and portfolio tracking in a regulated financial environment.

Amar Mahallah — Hyperlocal Marketplace *Flutter*

- App Store & Play Store. Neighborhood vendor discovery with proximity matching; full cart, auth, and order-management flows over shared REST APIs.

Courtside Bangladesh — Sports & Dining Experience Zone (United Group) *Flutter*

- App Store & Play Store. Contributed to the Flutter user booking app and the Flutter Cashier POS app for venue, event, and ticketing flows.

My Gazi — Sales & Workforce Management (Gazi Group) *Flutter*

- App Store & Play Store. Territory Sales Officer tracking, secondary sales reporting, payroll, leave, and attendance across Gazi Group's sales ecosystem.

EDUCATION

B.Sc. in Computer Science and Engineering (CSE) **2024**

Bangladesh Army International University of Science and Technology (BAIUST)

Key coursework: Data Structures & Algorithms, Database Systems, Software Engineering, OOP

CERTIFICATIONS

- HackerRank — SQL (Advanced), SQL (Intermediate), SQL (Basic); Python (Basic)
- Coursera — Foundations of User Experience (UX) Design
