SUMMARY

Full-stack software engineer with 2+ years of professional experience delivering mobile apps, web applications, and backend systems across Flutter, React, Laravel, and Node.js. Independently shipped two AI-powered apps live on the App Store and Google Play. Comfortable across the full product lifecycle — from architecture and API design to deployment and post-release support — with a strong focus on clean, maintainable code and real-world reliability.

TECHNICAL SKILLS

Mobile: Flutter, Dart, KIOSK apps, consumer apps, rider/delivery apps, Android; Google Play & App Store deployment

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI

State Management: Redux, Context API, React Query, Zustand; React Hook Form, Formik

Backend & APIs: PHP, Laravel (9/10), Node.js, NestJS, Express, FastAPI, RESTful API design, microservices

Databases: MySQL, PostgreSQL, MSSQL; AWS RDS configuration; query optimization, indexing

Auth & Security: JWT, OAuth2, Firebase Auth, Supabase Auth, role-based access control (RBAC)

DevOps: Git, Docker, GitHub Actions CI/CD, AWS (Windows & Linux), server configuration

AI & Dev Tools: Gemini API, OpenAI API (ChatGPT, Codex), Claude Code, GitHub Copilot, LLM API integration, MCP clients

EXPERIENCE

Jr. Software Engineer

Orange Solutions Ltd. — Dhaka, Bangladesh

Mar 2024 – Present

On-site, Full-time

- Contributed to **UniDash**, a multi-vendor restaurant ordering platform, across multiple product layers:
 - Solely built the **rider delivery Flutter app**, the **real-time order display web system** (for TV/kitchen screens), the **React web admin panel**, and the **Node.js item-sync microservice** for real-time menu synchronization with partner restaurant databases.
 - Collaborated with the team on the **KIOSK self-ordering Flutter app** (live at Station by Chef's Table), the **customer Flutter app**, and the **Laravel REST backend**.
- Delivered **Amar Mahallah** (App Store · Play Store), a hyperlocal marketplace connecting neighborhood vendors with local customers via proximity matching; built shared REST APIs across Flutter and web clients.
- Built **My Gazi** (App Store · Play Store), a sales and workforce management app for Gazi Group (Gazi Pipes, Gazi Toys, etc.): Territory Sales Officer tracking, secondary sales reporting, payroll, leave, and attendance modules.
- Built the **United Enterprise Bill Tracking System** (Laravel + React) from scratch — a procurement management web application for United Group tracking Purchase Orders, GRNs, and SRNs across their supply chain operations.
- Built **eJOTNO** (App Store · Play Store) — a healthcare platform connecting users with verified doctors and caregivers — fully developed end-to-end: cross-platform Flutter app, role-based secure workflows, and REST API integration.
- Improved backend query performance via MySQL indexing strategies; supported Docker-based CI/CD pipelines and AWS RDS configuration on staging environments.

Software Engineering Intern

Orange Solutions Ltd. — Dhaka, Bangladesh

Jan 2024 – Mar 2024

On-site

- Built the complete **Laravel + React admin panel** for **Courtside Bangladesh** (App Store · Play Store) (United Group / United City) — covering venue, event, booking, and ticketing management with RBAC; also contributed to the Flutter user booking app and Flutter Cashier POS app.
- Contributed to debugging, performance optimization, and backend improvements across internal products.

Software Engineer (Contract)

Swinroll Network Technologies Co., Ltd.

Jul 2023 – Jan 2024

- Developed and published Flutter and native Android applications to the Google Play Store.
- Built React admin dashboards backed by Laravel REST APIs; integrated Firebase authentication and push notifications.
- Automated build and deploy workflows via Docker and GitHub Actions CI/CD.

INDEPENDENT APPS

Pocket Hishab — AI-Powered Personal Finance App

Flutter + Supabase + Gemini AI

- Independently designed and shipped a personal finance app — Apple App Store · Google Play.
- Gemini AI-generated spending insights, rich transaction tracking, gamified saving-score and badge system, biometric app lock (Face ID / fingerprint), and a backend-agnostic JSON-first architecture.

Serein — AI Habit Tracker

Flutter + Supabase + AI

- Independently built and published a calm, AI-powered habit tracking app — live on Google Play.
- AI-driven nudges adapting to user behavior, streak tracking, completion analytics, offline-first sync, freemium subscription, and GDPR-compliant encrypted data handling.

SELECTED PROJECTS

UniDash — Multi-Vendor Restaurant Ordering Platform

Flutter + React + Laravel + Node.js

- Solely built: rider delivery Flutter app, real-time order display web system (TV/kitchen screens), React admin panel, and Node.js menu-sync microservice. Collaborated with the team on the KIOSK Flutter app, customer Flutter app, and Laravel backend.

United Enterprise Bill Tracking System (United Group)

Laravel + React

- Fully built a web-based procurement management system from scratch for one of Bangladesh's largest conglomerates; tracks Purchase Orders, GRNs (Goods Received Notes), and SRNs (Stock Return Notes) across their supply chain operations.

ZAB Prottoy — Securities Trading Platform (First Capital Securities Ltd.)

Flutter

- Adopted by 10+ BSEC-registered securities firms; real-time market charts, buy/sell order submission, and portfolio tracking in a regulated financial environment.

Amar Mahallah (App Store · Play Store) — Hyperlocal Marketplace

Flutter + Laravel + React

- Neighborhood vendor discovery with proximity matching; shared API across mobile and web; full cart, auth, and order management flows.

Courtside Bangladesh (App Store · Play Store) — Sports & Dining Experience Zone (United Group)

Flutter + Laravel + React

- Built the complete Laravel + React admin panel for venue, event, booking, and ticketing management with RBAC; contributed to the Flutter user booking app and Flutter Cashier POS app.

My Gazi (App Store · Play Store) — Sales & Workforce Management (Gazi Group)

Flutter + Laravel

- Territory Sales Officer tracking, secondary sales reporting, payroll, leave, and attendance across Gazi Group's full sales ecosystem.

eJOTNO (App Store · Play Store) — Healthcare Platform

Flutter + Laravel

- Fully developed end-to-end: cross-platform Flutter app connecting users with verified doctors and caregivers; role-based secure workflows for patients, doctors, and admins; REST API integration.

Orange MPOS Cloud (Web POS) & Orange MPOS (Android POS)

React + FastAPI + MySQL + Flutter

- Web POS platform (inventory, invoicing, sales workflows) built in React with FastAPI backend and MySQL; Flutter POS client for Sunmi hardware with REST API synchronization for operational reliability.

EDUCATION

B.Sc. in Computer Science and Engineering (CSE)

2024

Bangladesh Army International University of Science and Technology (BAIUST)

Key coursework: Data Structures & Algorithms, Database Systems, Software Engineering, OOP

CERTIFICATIONS

- HackerRank — SQL (Advanced), SQL (Intermediate), SQL (Basic)
- HackerRank — Python (Basic)
- Coursera — Foundations of User Experience (UX) Design

LEADERSHIP

- Joint Secretary, Computer Club (BAIUST) — 2022
- Vice President (Organizing), Computer Club (BAIUST) — 2021–2022
